

NEWS RELEASE

Bank Software Developer DCI Adds Authentication Services From Authentify

HUTCHINSON, KAN., November 3, 2014 – Authentify, Inc., a supplier of two-factor authentication services to financial services firms, has announced that Data Center Inc. (DCI), the privately-owned developer of iCore360® core banking software and related technologies, has agreed to supply its nationwide community bank clients with Authentify's phone-based authentication services for DCI's Inter@ct™ online banking features.

The agreement paves the way for DCI to offer community banks additional account protection against keystroke malware and man-in-the-middle attacks.

“Authentify helps us provide our banks and their customers with greater protection against the increasing online criminal element,” said Daren Fankhauser, DCI vice president of Research & Development. “Authentify has direct experience in our customer space, and we believe we selected the best.”

DCI's iCore360® bank software and technology is used by hundreds of community banks that support local economies.

“These banks are often the backbone of their communities,” said John Jones, DCI president and CEO. “The combination of Authentify and iCore360® ensures they can confidently offer their communities more high-value online services that are safe and secure.”

Peter Tapling, president and CEO of Authentify, concurred. “When a Fortune 500 company like JP Morgan Chase is breached, it's a huge story, but JP Morgan's ability to cope is also huge,” he said. “The community banks serviced by DCI need practically the same level of protection as JP Morgan Chase. They, however, must rely on partners like DCI, and we're happy to be a part of that protection.”

About DCI

DCI is the developer of the award-winning iCore360® core banking software and related technologies for community banks nationwide. DCI is privately owned by banks, with several clients serving as owners, board members and user group leaders. In addition to iCore360® (available hosted or in-house), DCI offers integrated solutions for Internet and mobile banking, private ATM network and card management, teller/branch automation, remote capture/proof, dashboard analysis, compliance, custom reporting and more. About Authentify

Founded in 1999, Authentify delivers intuitive and consistent multi-factor authentication services that are dependable and multi-layered protecting user accounts or key information from unauthorized access. Where many authentication techniques are powerless when legitimate credentials are wielded by hackers and imposters, Authentify succeeds. Certainty is powerful. Be certain with Authentify.
